

SOCKET & SEE™

SAFE CASE

Practical, soft
carry case

- Dual compartments provide separate sections for Voltage Indicator and Proving Unit
- Safeguards instruments from damage and harsh conditions
- Convenient access with pre-cut holes for Proving Unit functionality without removal
- Features neck strap and belt loop for on-site portability
- Flexible and functional
- Protects against accidental bumps and elements
- Keeps instruments organised and readily accessible
- Specifically designed Socket & See test instruments
- High-quality construction ensures long-lasting use
- Compact and lightweight: Easy to carry and transport.

Description

The Socket & See SAFE CASE is a practical and secure soft carry case designed exclusively for your electrical test instruments and tools. This thoughtfully designed case consists of two compartments that prioritise functionality and protection.

While the rear compartment ensures the safety of any Socket & See voltage indicator, the smaller front compartment can securely house your Socket & See Proving Units, including the SP200 and SP400 models. The clear front panel with pre-cut holes allows you to access all functions of the proving unit without removing it from the case.

For convenient transportation on-site, the case includes a neck strap and belt loop, providing flexibility and easy access to your equipment.

With its practical design and reliable protection, the SAFE CASE ensures your Socket & See instruments are kept safe and easily transportable. Enhance your

efficiency and peace of mind during electrical work with this essential companion!
