SOCKET & SEE™

SOKDC16KIT
Essential
Data Centre Kit

- Essential solution tailored for data centre testing

- Includes robust Socket & See SOK40 Industrial Socket Tester

- Vital Socket & See ADPC14B Adaptor with locking IEC power adaptor mechanism

- Adaptors adhere to IEC/EN 60 309 standards for safety compliance

- Sturdy rubber holster ensures durability for heavy-duty use

- Clear visual and audible indications for accurate wiring assessment

- TECC40 Large Instrument Carry Case for convenient storage and transport

- Seamless conversion of 3-pin socket outlet to IEC connection for versatile testing

Description

Presenting the Socket & See SOKDC16KIT Industrial Data Centre Kit, meticulously crafted to empower data centre professionals in enhancing testing precision and security. This all-in-one solution is custom-tailored to meet the rigorous standards of data centre environments, providing indispensable testing instruments within a robust carrying case for enhanced portability and organisation. At its core lies the Socket & See SOK40 Industrial Socket Tester, encased in a sturdy rubber holster engineered to withstand demanding usage. Delivering distinct visual and audible cues for accurate wiring assessment, this tester ensures utmost safety with continuous and warbling tones signalling various electrical faults.

Included in the Socket & See SOKDC16KIT is the essential Socket & See ADPC14B Adaptor, featuring a locking IEC power adaptor mechanism for secure connections. This adaptor seamlessly converts from a blue 3-pin socket outlet to an IEC connection, adhering to IEC/EN 60 309 standards for safety compliance. With its robust construction, it maintains reliable connections even in complex setups,

guaranteeing uninterrupted testing procedures. For effortless storage and transportation, the kit is accompanied by the Socket & See TECC40 Large Instrument Carry Case. Boasting four separate compartments and additional pockets for manuals, datasheets, and calibration certificates, this case facilitates efficient organisation of tools and documentation. Its design allows for easy access, while a durable carry strap and twin zips, lockable with a padlock (padlock not included), enhance both functionality and security.
